

Atellio family: LUNA Series

Firmware and AUDAC Touch™ update

We would like to bring you another update about the Atellio family. Please make sure you are always running the latest version of AUDAC Touch™. You can find the latest versions here: <https://audac.eu/eu/software/audac-touch>

Release on December 6th

- Luna firmware version: 1.2.2

New features

- Firmware updates of LUNA via AUDAC Touch™ on the same network. One last Luna firmware update (to 1.2.2) is needed via the front panel.
- Luna GPO triggering via Luna event handler and NCP105
- Event handler settings backup and restore via file browser
- VoiceFile support for messages on internal SDCard
- Luna bug fixes
 - No audio when mapping a mono sum input to an output
 - Mute status incorrect after repower
 - Linking output audio functions
 - Improved settings handling
 - Multiple small fixes and improvements

Known limitations for the latest version (December 6th)

Luna series – V1.2.2

- 1 extra future firmware update via USB needed for activating OTA operating system updates.
- For licenses, the LUNA series require an internet connection. Offline activation via USB will be implemented later.
- Changing IP settings requires a device reboot.
- GPO triggering not available as action in event handler

Release on October 31st

- Luna firmware version: 1.2.1

New features

- Simple commands interface (routing/volume up-down) on the LUNA & the NWP series.
- Internal Event Handler on Luna.
- Luna bug fixes
 - Volume change ticks
 - In some situations no audio on output 1
 - Zone 1 test signal issue
 - MAC address shown incorrectly

- Luna device and VoiceFile settings backup and restore via file browser

Backup and restore of settings for Event handler will be available in November

- Dashboard widget for mixer slider

Known limitations for the latest version (October 31st)

LUNA series - V1.2.1

- 1 extra future firmware update via USB needed for activating OTA operating system updates.
- For licenses, the Luna series require an internet connection. Offline activation via USB will be implemented later.
- Changing IP settings requires a device reboot.
- GPO triggering not available as action in event handler

Release: September 29st

- Luna firmware version: 1.2.0

New features

- Simple commands interface (routing/volume up-down) on the LUNA

Release: September 21st

- Luna firmware version: 1.1.1
- Touch version: 2.11.2 Download it here:
<https://audac.eu/eu/software/audac-touch>

New features

- Voice file player available in Luna device settings

Release: September 13th

- Luna firmware version: 1.0.1
- Touch version: 2.11.1 Download it here:
<https://audac.eu/eu/software/audac-touch>
