

INTRODUCTION

CAYMON's designers are convinced that one of the most important indicators to identify a company, is its customers: the people that once bought our products for the first time and experienced them in everyday life, getting to know them better, and eventually keep buying them.

At this moment, CAYMON offers a vast range of installation products, ranging from racks, microphone, music and speaker stands to brackets, adaptors and accessories.

This assortment for its part reflects on their variety of customers and thus applications, which vary from churches to concert halls, from nightclubs to cultural centres, from individual musicians to symphonic orchestras.

An extensive product range requires a clear vision on past, present and future.

That's why, many years ago, CAYMON's foundation was based on four solid principles, which have been our company standards ever since: the aim to look ahead and anticipate worldwide tendencies, the aspiration to combine functionality with contemporary design, the decision to settle for no less than the highest quality and the continuous keeping in mind of our existing, new and potential customers.

These standards remind us where we're coming from and what we're aiming for, in an ever-changing, ever-innovating market.

GPR SERIES

Flush installation of 19" equipment is made possible using the GPR series racks which are compliant to ANSI/EIA RS-310D, DIN41491 and IEC60297 standards. The slide-out construction allows rack integration into walls or furniture, while keeping the rear side of the equipment accessible for maintenance and servicing. The extending equipment bay rotates over a 90° angle in either direction, while a rear cable support allows effective cable management. They come available in various heights ranging from 12 up to 24 rack space.

OPR SERIES

The OPR series are solid constructed open-frame racks for 19" equipment compliant to ANSI/EIA RS-310D, DIN41491 and IEC60297 standards which are suitable for wall mounted or floor standing installation. The rugged construction made of 2 mm thick steel allows pre-loading of the equipment before transportation to the installation site. Finishing is done in a black (RAL9004) powder coating with fine structure while punched equipment mounting profiles on front and both sides offer a multifunctional use of the cabinet. Delivered in a flat-down package, the simple structure allows assembly by a single person in a record-breaking time. Available in various heights from 3 up to 18 rack spaces.

DPR SERIES

A sturdy and low-cost solution for installation of a large number of 19" equipment is offered by the DPR 4-post open frame rack series which are compliant to ANSI/EIA RS-310D, DIN41491 and IEC60297 standards. The open frame construction is made of solid steel and finished in a black (RAL9004) powder coating with fine structure. Adjustable vertical supports allow in depth adjustment within a range of 55 to 101.5 cm. Delivery in a flat-down package allows easy transportation of the rack to any installation location. NPR SERIES

The NPR series racks are designed for installation of 'half-rack' sized electronic equipment, allowing wall mounted or floor/table standing installation. Half-rack sized equipment popularity is growing in the professional AV and IT market. Typical installation applications include amplifiers, wireless microphone systems, audio & video matrixes and switchers and network switches & routers. They are constructed using a cold rolled steel frame with a thickness of 1,5 mm and 1,2 mm plates, finished in a black (RAL9004) powder coating. The mounting profiles are reversible, allowing installation for both 9.5" (mainly IT) and 10.5" (mainly AV) equipment installation. The front is finished with a reversible tempered glass front door with a wing-knob lock. Other features for this product range are removable and lockable sides, in depth adjustable 19" profiles, ventilation grid in top panel, ...

EK100

EARTHING KIT FOR 19" RACK CABINET

EK100 is a universal, easy to use earthing kit for 19" rack cabinets. The kit includes 4 cables with 2 M6 cable lugs for connecting the main chassis to the doors and removable side panels and 1 cable with M6 and M3 cable lug for connecting the main chassis to the grounding point on a PSR power distribution unit. The cables for the removable panels have quick disconnect connectors in the middle for easy disconnection. The cross section of the cables is 6mm² and all mounting hardware is included.

SPR10DC

DUST COVER BRUSH

The SPR10DC is a dust cover brush which is meant to be used for covering the cable inlets which are provided in the SPR and WPR racks. When the racks are installed in industrial environments, through time dust and dirt will enter the racks through all small gaps and openings. In the longer term, this can have a negative influence on the performance of the equipment which is installed in the racks.

SPR10CSS

SPR10CSS

The SPR10CSS connects 2 racks together without nuts. Every rack is fitted with holes on top allowing for a quick and easy installation of the SPR10CSS. This results in a good strong connection yet maintaining nice clean look. For use with SPR & WPR racks.

WPR10CL

WPR10CL

The WPR10CL is a 3 digit combination lock specifically developed for the CAYMON WPR and HPR series. By installing the WPR10CL you can create a secure lockable 19" cabinet perfect for storage of precious 19" equipment.

WPR10RF

WPR10RF

The WPR10RF is a 120 mm sleeve bearing axial ventilation fan for installation to the top compartment of any matching rack. When installed to the provided mounting holes, the rising warm air will be removed from the top section, improving the air flow throughout the cabinet.

CABLE ORGANIZER

BCO101 + BCO242

HORIZONTAL & VERTICAL CABLE ORGANIZERS

The BCO Series Cable Management Systems provide efficient cable organization for 19" racks. The BCO101 ensures tidy horizontal cable routing in a single rack space, while the BCO242 offers high-capacity vertical cable management for 42U SPR racks. Both enable clean installations with bidirectional access for optimal rack organization.

An indispensable tool for every flight case or 19" rack with high-value equipment. These units feature 9 power sockets on the backside which are protected by the 16A circuit breaker on the front and can provide up to 4000W of power. 2 Handy USB power outlets on the front of the PSR can be used to charge devices such as tablets, phones and other mobile devices. Another great feature of both power distribution units is the built-in rack light which uses a strip of daylight white LEDs that can be dimmed with a rotary dial on the front. The PSR529 is additionally equipped with surge protection and an AC voltage and current indicator on the front of the unit that will give the user visual feedback of the input voltage before turning on the equipment and amperage drawn once the system is in use, invaluable information for system technicians.

INTELLIGENT POWER SEQUENCER

The PSQ108 is an intelligent power sequencer with 8 x IEC C13 outputs which can be remotely switched using AUDAC Touch™ via TCP/IP or RS-232 connection. It also features front controls for manual control. Several PSQ108 devices can be daisy chained together so that only one IP address is needed for controlling all units. The sequential power on/off function reduces the inrush current of the connected devices when power is turned on and by using the configurable delay times, the order in which the devices turn on can be set. Other features include short circuit and overcurrent protection by means of a 16A circuit breaker, a voltage and current display and a front USB charging port (max 1000mA).

- AUDAC Touch™ compatible via TCP/IP and RS-232
- Daisy-chaining possible
- Manual control possibilities
- 2.5 meter connection cable (3 x 2.5mm²)
- Male Schuko (CEE 7/7) input connection
- Integrated overvoltage protection type 3 (with monitoring)
- Double-pole switching
- High inrush current relays

Seamless integration with AUDAC Touch™

The PSQ108 intelligent power sequencer offers seamless integration with AUDAC Touch™, enabling remote control via TCP/IP or RS-232. Effortlessly manage power sequences for multiple connected devices from a centralized, intuitive interface. With customizable delay settings, overload protection, and real-time voltage monitoring, the PSQ108 ensures a reliable and streamlined power management solution for any AV installation.

RACK SHELVES

The IS Series offers versatile rack mounting solutions with 1U, 2U, and 3U options, designed for modern installations. Crafted from 1.5 mm cold-rolled steel, these shelves ensure durability and reliability. A key feature is the modular fixation system, allowing easy mounting for devices without 19" ears. With an expanded width and 300 mm usable depth (1U also available in 180 mm), the IS Series provides ample space for your equipment. Optimized ventilation cutouts enhance airflow, while optional faceplates (half & quarter-width) and back support increase stability. Integrated cable lacing cutouts simplify cable management, and the black powder-coated (RAL9004) finish ensures durability with a fine-structured, scratch-resistant surface.

DRAWERS

The RDx20x series of 19" rack drawers comes available in 3 different unit heights with and without lock. These rack drawers can be used for storage of any belongings related to the rack mounted equipment, such as cables, microphones, wireless transmitters, headsets, remote controls, instruction manuals, etc. The chassis is constructed of 1,5 mm thick cold rolled steel, while the tray is finished in 1,2 mm thick cold rolled steel. Both finished in a black (RAL9004) powder coating with fine structured finish which ensures an improved scratch resistance. They feature full extension 3 section drawer rails, pushout holes on the back of the tray for cable insertion, a rubber anti slip liner and optional back supports for increased load capacity.

MODULAR SOLUTIONS

CASY SERIES

The CASY system joins the CAYMON product range as a flexible solution for a wide variety of applications in terms of system integration and connectivity. This system consists of an entire product range containing different base frames which allow an extensive range of optional modules to be installed. This results in a plug and play, solderless system offering flexible solutions in terms of connectivity, power distribution, internal rack supplies and many more.

The CASY system is built-up around a main-chassis, available in a range of sizes, mountings and depths. The range of modules goes from standard closed and vented blind panels to connection modules featuring audio connectors, video and data connectivities, power switches & sockets, volume controllers, strain reliefs and many more. The number of configurations is enormous and the number of applications where this system can offer tailored solutions is infinite.

BlindSnap™

The BlindSnap™ system allows both placement and fixing from the top side of the mount. No more fiddling with screws on the bottom of the table while you try to tighten them from the top.

Easy & flexible mounting

This blind fixing system can be easily adjusted to any type of table thickness and stays in place without the use of screws in the table. The mount could even be used in glass or thin metal tops (min. thickness 5,6 mm).
